

Topics covered in Lecture 2

- File hierarchy
- Meanings of special directories (`/etc`, `/bin`, ...)
- Shell and command line
- Basic structure of a command line command
 - `<command> <flags> <args>`
- Navigation with the command line:
 - `pwd`
 - `cd` (`cd ..`, `cd .`, `cd -`)
 - `ls` (`-l`, `.`, `..`)
 - interpreting the output of `ls -l` (owners/groups, permissions, ...)
 - tab completion
 - paging commands (`less`)
- Piping

Topics covered in Lecture 3:

- Pattern search
 - `grep`
- Working with commands
 - wild card (`*`)
 - `man`
 - using `--help`, `--version`
- System info commands (pt 1)
 - `printenv`
- Environment variables
 - `echo $ ...`
- Reading/editing files
 - `less`, `more`
 - `cat`
 - `vim`
- Understanding `.bashrc`
- Aliases
 - create alias for recently modified files/dirs
 - `.bash_aliases`
